CPU has developed a good reputation statewide for our prompt friendly service and our competitive prices. CPU is a full service computer dealer. We provide professional, authorized warranty service for the products we sell. That's rare these days in an industry where most retailers typically outsource support services to off shore representatives. When you call CPU for support or warranty services you'll get to speak directly to one of our A+ certified service technicians in Casper, not a stranger in India, Mexico or a Geek at the retail chain store. We consider our clients to be friends and nothing makes us happier than insuring that you are completely satisfied.
